

UNFOLDING OPPORTUNITIES

WHY CHICAGO BIFOLD?

We know that bifold doors and windows can make a positive impact on your business. Quality bifold doors and windows enhance your environment to help create better engagement with your customers. From restaurants to car dealerships and other gathering spaces, we create custom bifold door and window solutions that fit your application and achieve your desired look and feel.

Value

Chicago BiFold provides high quality bifold door solutions at a lower cost than other major suppliers. Working directly with the manufacturer, we eliminate the additional costs of distributors and other middle suppliers.

Ease

Chicago BiFold's straight-forward designs are easier to install and simpler to use. We provide clear communication throughout the entire design and manufacturing process with fast lead times.

Support

Chicago BiFold works with you to create a custom solution that captures the experience you want to create and fits your application from a technical standpoint. We take a consultative approach that starts by asking you *"What do you want to achieve with this space?"*

HOW WE WORK

From quoting to delivery, we take a simple path with clear communication along every step of the way.

Discovery

We'll discuss project specifics with your team and determine what you wish to achieve with our bifolds, so we can provide solutions that make the most sense for your space.

Concepting

Our detailed quotation will include all manufacturing features and a quotation drawing that shows an elevation drawing and the product. Once you are satisfied and have confirmed all the details, we'll make any last adjustments to the drawing and make sure it is an exact, clean and final drawing.

Production

Upon approval of the final drawing, we begin the manufacturing process. With some of the fastest lead times in the industry, your bifolds will be ready before you know it!

Testing & Delivery

All Chicago BiFold windows and doors are tested in our facility prior to shipment to ensure the utmost quality and function. (You can view testing videos of our bifolds on our YouTube channel). We ship our bifolds in heavy-duty crates via reputable freight carriers, ensuring timely and damage-free delivery to your installation contractor or jobsite across the country.

APPLICATIONS

Bifold windows and doors can enhance the space in a variety of applications. We have experience designing and manufacturing custom bifold solutions for the following:

Restaurants & Bars

Bifolds bring the pleasing ambiance of the outdoors to your dining space and provide a more inviting transition to outdoor patios and beer gardens.

Auto Showrooms

Bifolds provide a more attractive and functional alternative for bringing vehicles into and out of your showroom.

Commercial Spaces

Bifolds offer unique opportunities in hotels, conference rooms, entertainment venues, retail and offices, bringing more versatility and appeal to your space.

PRODUCT TYPES & FEATURES

Custom Configurations

We offer a wide range of bifold window and door configurations, with bifold panels folding to one or both sides of the opening, and swinging to either the interior or exterior of the building. With options such as transoms, sidelites, man-doors and more, we can design custom configurations with the look you want and the features you need.

Aluminum Finishes

We stock Clear and Dark Bronze anodized aluminum finishes. We offer a number of additional anodized finishes and standard painted colors. Blended standard and custom colors are also available, providing you with an infinite variety of aluminum colors. For more information on the finishes we offer, visit Tubelite® Inc's finishes page. Our finishes are backed by some of the best warranties in the industry.

Glass Types

Our options for glass types are also endless. Standard glass types are 1/4" clear, grey, green-blue and bronze tinted, tempered, or 1" insulated clear, grey, green or blue or bronze tinted, tempered.

Steel Tie-Rod Construction

Steel tie-rod assembly gives our bifolds their incredible endurance. Tie-rod assembly is as durable as welded corner construction, but superior in many ways. No other door offers you this much strength and flexibility.

Hinges and Trolleys

Our bifold panels are hung on mortised continuous geared hinges and carried by overhead guide trolleys. Our standard hinge has a load rating of up to 600 lbs., our heavy-duty hinge has a rating of up to 1,000 lbs. Our trolleys can carry up to 250 lbs each, providing plenty of strength to carry our commercial-grade bifold panels.

WARRANTY

Products designed to last a lifetime:

- Lifetime warranty on continuous geared hinges
- Industry-leading five-year manufacturer warranty on Class I anodized aluminum finishes; two-year warranty on Class II anodized aluminum finishes; 10-year warranty on 70% PVDF (Kynar) painted aluminum finishes
- 10-year warranty on insulated glass

Recycled Aluminum:

- 100% of our extrusions are made with recycled aluminum content
